WINN ARMY COMMUNITY HOSPITAL CLINIC AND DEPARTMENT CHANGES AND RELOCATIONS

Fort Stewart, Ga., February 12, 2016 – Pardon our Progress at Winn Army Community Hospital.

On February 26th, the Patient Advocate Office will relocate to the Surgery/Urology waiting area. This temporary relocation is occurring due to remodeling and construction in the main hospital. We estimate Patient Advocate will be located in this area for approximately 12 months. We recommend patients and staff use the Liberty Wing entrance for business with Patient Advocate.

Questions and concerns about your care should be directed to the Patient advocate at 912-435-6143.

On February 25th, Respiratory Therapy and EKG will be relocated within the Outpatient Clinic. Also, on February 26th, the Allergy and Immunizations clinic will be relocated within the Outpatient Clinic. These moves are happening to optimize the healthcare services Winn provides to our patients with a better locations and new equipment. The new locations are across the main hall from their current location in the Outpatient Clinic at Winn ACH. We recommend patients and staff use the Liberty Wing entrance for business and appointments at these clinics.

Questions about your care in these clinics should be directed to your providers.
