

DEPARTMENT OF THE ARMY
UNITED STATES ARMY MEDICAL DEPARTMENT ACTIVITY
1061 HARMON AVENUE
FORT STEWART, GEORGIA 31314-5641

Welcome to the overseas screening process.

Our goal is to help your family get to your next installation as quickly as possible, while helping to ensure your family will have access at your next installation to the medical services they deserve!

Your overseas screening appointment has been scheduled:

DATE: _____ TIME: _____

Please ensure all family members have had a recent physical in the last year. If a family member UNDER age 18 has not had a physical in the last year, it will be completed at the overseas screening appointment. If a family member OVER age 18 has not had a physical in the last year, you will be provided a pending letter and requested to schedule an appointment with the patient's physician. This must be completed before you can be cleared by EFMP for your orders.

If you have been seen by a provider off post for your primary care, you must provide the last year of medical records at your overseas screening appointment. If you have not been seen by any provider in the last year at any location, you will need to schedule an appointment with a provider to have a physical and bring that record to your appointment. If you fail to provide these records or have not had the required physical, you will be provided a pending letter. This must be completed before you can be cleared by EFMP for your orders.

The day of overseas screening appointment, you will proceed to check in at the **EFMP CLINIC WAITING ROOM** located in the ENT/Pediatrics Wing; the appointment will take approximately 1.5-3 hours depending on the number of family members to be screened and the complexity of their medical history. At the visit, your medical records will be extensively reviewed to include all past diagnoses, medications (filled on and off post), allergies, past visits and past referrals.

If a family member is identified to require EFMP medical enrollment, in accordance with AR 608-75, you will be educated and started on the enrollment process. A DD 2792 will needed to be completed by your PCM or specialists and must include all diagnoses identified as requiring enrollment. If you are identified on requiring EFMP medical enrollment, you will receive a separate packet at your visit explaining the process.

If there is an educational concern, the Soldier or spouse will be asked to have the staff at the child's school or early intervention program complete the DD 2792-1 and attach a copy of the child's Individualized Family Service Plan (IFSP) or Individualized Education Program (IEP). If you are identified on requiring EFMP educational enrollment, you will receive a separate packet at your visit explaining the process.

At the conclusion of your visit, you will return to the EFMP office to turn in your DA 5888 and DA 7246. If they have been signed and no family member requires EFMP enrollment or update, you will be provided copies to return to levy for processing of orders. If you have been provided a pending letter, it will show what further information or records are required. Your packet will be placed in a pending status until the additional records, information or enrollment have been completed.

If you have any further questions, please do not hesitate to ask a member of EFMP staff.

Dr Harriette K Flather, DO
EFMP Medical Director
Winn Army Community Hospital
